

Time for a new AUT-O-LOC.™

The Preferred Choice of
leading gym equipment
manufacturers

1st Generation - 1988

Patented in 1988,
the first generation
automatic locking
backstop safety device

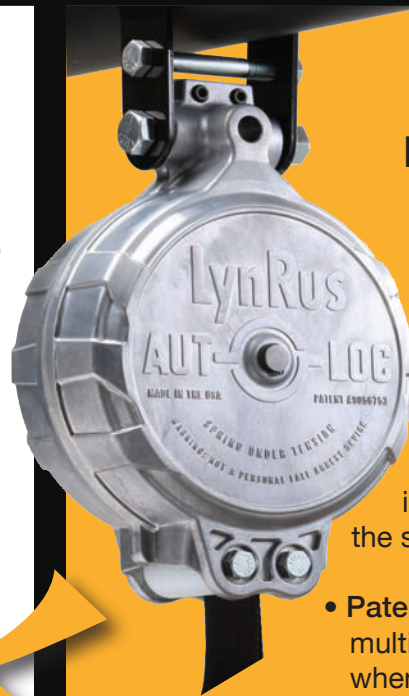

- Single point drum support
- Pawls lock and release after a load is caught allowing multiple loads to be caught without notification
- The average Aut-O-Loc1 Unit is 23 years old

LynRus recommends
replacing your Aut-O-Loc™
after 15 years of use.

www.lynrus.com

3rd Generation - 2017

Patented in 2017,
Introducing The New
Aut-O-Loc 3™
by LynRus

- New 3rd generation patented design in 2017
- Multi point drum support increases strength and sets the standard for backstop fall safety
- Patented Secure-Loc™ locks three multidirectional pawls permanently when equipment falls are caught.
- Integrated fall indicator lets you know the unit has caught a load
- Integrated pivot mount significantly reduces point load forces on structure during a fall
- Belt guide system reduces belt wear and increases capacity

**REGULAR INSPECTIONS CAN HELP SOLVE
POTENTIALLY DANGEROUS ISSUES.**

For assistance with inspecting your equipment,
please contact your local
gymnasium equipment professionals!
